

THE RIDE STARTS HERE.

2025/26

ABOUT US

ABOUT US

THUN stands for over 100 years of experience and passion in developing and producing high-quality, functional, and honest bicycle components made in Europe. Where human muscle power is converted into drive and motion forces, THUN components ensure a safe and stable ride. Regardless of where and how a bicycle is utilized and whether it is purely human-powered or electrically assisted, THUN offers the right components for it and supplies them globally, quickly, and flexibly.

PURPOSE

PURPOSE

THE RIDE STARTS HERE

We exist to spark (a) movement. It's our purpose to drive transformation in order to create a future worth living – for our team members and their families, our shareholders, our community, our business partners, our industry, our democratic political system, and society at large.

VISION

CYCLING INTO A FUTURE WORTH LIVING

We push towards cycling becoming a central pillar of a liveable future and the mobility of tomorrow.

VISION

MISSION

MISSION

HONEST BICYCLE COMPONENTS

We develop and manufacture honest components for bicycles and e-bikes and market them along with related services to manufacturers and cyclists. At the same time, we promote cycling and its benefits within our culture and through association work and advocacy. We are committed to ensuring that it remains easily accessible and affordable for everyone.

VALUES

Honest
Approachable
Trailblazing
Accountable
Quality-minded

VALUES

MANIFESTO

MANIFESTO

The ride starts here. Every single second makes a difference. **You** make a difference. Get on your bike. In the city. In the countryside. Wherever. On any road. On any trail. In any weather. Just start moving. Start a movement. Set an example. Set boundaries. Be kind to others. Find balance. Screw Perfection. Foster change. Embrace failure. Prioritize your health. Eat well. Work those muscles. Take breaks. Go dancing once in a while. Sit by a campfire. Spend time with family and friends. Watch the sunrise. Enjoy simplicity. Do what you are passionate about. Make it count. **Make it yours.**

COMPANY PROFILE

COMPANY PROFILE

Surrounded by forests, meadows, and nature, THUN's offices and production facilities are located right by the river in a natural reserve belonging to the town of Ennepetal in North Rhine-Westphalia, Germany. Here, a team consisting of roughly 50 skilled employees handles the production of up to several ten thousand bicycle components per day. The company has been run as a family business since its foundation in 1919. Everyday business is strictly process and KPI driven with the entire production being managed with lean concepts and tools and advanced MES software. Cutting-edge technology and powerful validation methods like optical and sensory 3D measurement are used to guarantee the quality of any product leaving production. THUN's sophisticated quality and process management is certified as per ISO 9001. Due to an excellent production and supply capacity, THUN is capable of producing and shipping orders in a matter of only a few days.

NOVELTIES

NEW

NEW

BOLERO

- ISO 4210-8 racing bikes (BOLERO-ML SL)
- Cold-forged and ZN-coated (A2B) steel spindle
- 2RS ball bearings
- Composite sleeve
- Composite cups
- LH cup available with and without shoulder
- RH cup or both cups compatible with PEDRO'S® key
- Selection of extra-short spindle sizes
- Deep-drilled SL (super light) spindle (BOLERO-ML SL)

**ENTRY-
LEVEL
BOTTOM
BRACKETS**

DINKY

ISO 8098 bicycles for young children
Compatible bb-housings (mm): 68, 73
Cold-forged and phosphated steel spindle
ZZ ball bearings
Composite cups
Both cups compatible with PEDRO'S® key

LIMBO

ISO 4210-8 city-trekking bikes
Compatible bb-housings (mm): 68
Cold-forged and blackened steel spindle
ZZ ball bearings
Composite cups
Both cups compatible with PEDRO'S® key
Selection of extra-short spindle sizes

HULA

ISO 8098 bicycles for young children
Compatible bb-housings (mm): 68
Cold-forged and phosphated steel spindle
ZZ ball bearings
Composite cups
Both cups compatible with PEDRO'S® key
Selection of extra-short spindle sizes

TWIST

ISO 4210-8 city-trekking bikes (TWIST)
ISO 4210-8 mountain bikes (TWIST-ML)
Compatible bb-housings (mm): 68, 73
Cold-forged and ZN-coated (A2B) steel spindle
ZZ ball bearings
Composite cups
Both cups compatible with PEDRO'S® key

GOAL

ISO 4210-8 city-trekking bikes
Compatible bb-housings (mm): 68, 73
Cold-forged and blackened steel spindle
ZZ ball bearings
Composite cups
Both cups compatible with PEDRO'S® key

MAMBO

ISO 4210-8 city-trekking bikes (MAMBO)
ISO 4210-8 mountain bikes (MAMBO-ML SL)
Compatible bb-housings (mm): 68
Cold-forged and ZN-coated (A2B) steel spindle

RUMBA

- ISO 4210-8 City and trekking bicycles*
- ISO 4210-8 Mountain bicycles*
- ISO 4210-8 Racing bicycles*
- For cranksets with a spindle diameter of (mm): 24
- Compatible BB-housings (mm): 68, 73
- 2RS ball bearings
- Composite sleeve
- Composite cups
- Various composite spacers

Diameter reduction ring

Ball bearing either made in China or made in Germany

Individual spacer configuration (in this case a single 2 mm spacer)

Available spacers:

Spacer 0,8 mm

Spacer 1,6 mm

Spacer 2 mm

Spacer 2,5 mm

* RUMBA is designed to pass certification tests as per this standard whereas additional certification tests need to be commissioned with cranksets chosen by our customers.

E-BIKE SENSORS

X-CELL RT 3.0

Magnetoelastic bottom bracket torque and cadence sensor
Senses rotation, rotational direction and torque
EN 15194 and Part 2, ISO 4210-8 mountain bikes
Compatible bb-housings (mm): 68, 73, 83
CNC-machined and zinc-coated (A2B) steel spindle
2RS ball bearings
Composite and Macromelt® sleeve including sensor technology
Composite cups
Both cups compatible with PEDRO'S® key
Nano-coated PCB
IP 55 rating of sensor*
Equipped with STANDARDIZED INTERFACE SYSTEM
Other cable and connector options on demand
Compatible with Gates Carbon Drive products

STANDARDIZED INTERFACE SYSTEM

FOR X-CELL RT 3.0

The Standardized Interface System consists of a standardized cable (cable length: 220 mm) and a standardized connector (Higo Mini Z509 FG Male or Julet L610 AM Female). This cable and connector form the interface. When OEM customers require a different connector or cable length to connect the X-CELL RT 3.0 to their controller, they will need an extension cable with a Standardized Interface System-compliant connector on one side (Higo Mini Z509 FM Female or Julet L610 AM Male) and their desired controller-compliant connector on the other side. Such extension cables can be sourced globally from several of THUN's cooperation partners. Further details are available upon request.

THE STANDARDIZED INTERFACE SYSTEM ...

- ... allows the perfect blend of cable and connector standardization and customization
- ... drastically reduces lead times
- ... guarantees availability of spare parts
